

Full Stack Developer

About Us

Founded in 2015, Touchcore Systems is a mid-sized IT company providing software solutions and services in the healthcare space. We are a team of engineers and designers building innovative and cutting-edge software solutions. We are a people-centric organization where we aim to not only make profits but create a space that motivates people to be creative and give their best at work. We offer a suite of healthcare products and services that aim to improve quality of care and outcomes for patients.

Experience Level: 4-6 Years

Location: Pune office

Joining: 2-3 months' notice

Responsibilities

- Design, develop, and maintain efficient, reusable, and reliable .Net and Single Page applications.
- Lead the development team in the design phase, implementation, and deployment of software projects.
- Work with project managers and clients to understand requirements and deliver innovative solutions.
- Implement performance and quality modules to ensure software quality and responsiveness.
- Collaborate with other team members to integrate .Net and Single Page applications with existing systems.
- Provide technical support for web applications.
- Update and maintain documentation for software functionality and code.
- Identify bottlenecks and bugs, and devise solutions to mitigate and address these issues.
- Mentor junior developers, reviewing their code and providing constructive feedback.

Qualifications

- Bachelor's or Master's degree in computer science, Engineering, or a related field.

- 4-6 years of experience in .Net and Single Page development, with a strong understanding of the .Net framework and object-oriented programming principles.
- Proficient in C#, with a good knowledge of its ecosystems.
- Familiarity with the ASP.NET framework, SQL Server, and design/architectural patterns (e.g., SOLID Design patterns)
- Strong understanding of NoSQL Databases.(MongoDB/CosmosDB)
- Should possess proficiency in Single Page Application (SPA) frameworks such as Angular or Vue.
- Writing HTML, CSS, JavaScript/TypeScript, and developing usable Web UIs using Responsive Design (Bootstrap)
- Should have basic Understanding of Azure Cloud Services.(e.g., Azure, AWS)
- Knowledge of Windows Presentation Framework and creating database schemas that represent and support business processes.
- Experience implementing automated testing platforms and unit tests.
- Proficiency with Git or any other version control systems
- Excellent troubleshooting and communication skills.
- Ability to work in a fast-paced environment and manage multiple projects with tight deadlines.
- Ability to quickly grasp complex business and technical requirements and express those clearly in written and verbal form.
- Experience in using Agile & Scrum software frameworks.

Nice to Have

- Experience developing reports and/or data visualizations is a plus.
- Experience or knowledge of devOps CI/CD pipelines.
- Knowledge of containerization technologies (e.g., Docker, Kubernetes).

Perks & Benefits

- Management's commitment to maintain work-life balance.
- Flexible leave structure
- Performance based bonus
- Challenging role with meaningful impact
- Several new initiatives will require building solutions from scratch.
- End-to-End ownership of work and ability to make independent decisions.
